

# FIRE PREVENTION

## HOW TO STAY SAFE

### EDUCATE

Adults and children should know the basics: the sound of smoke alarms, the location of the nearest fire escape, and emergency numbers.

### CREATE AN ESCAPE PLAN

Families should have a fire escape plan with exit points for every room in the home. Practice your fire escape plan. Know how to stop, drop, and roll.

### INVEST

Smoke alarms and fire extinguishers are essential in fire prevention. Have both in your home and office for protection.

### FIRE PREVENTION STARTS WITH YOU!

**TURN OFF & UNPLUG ALL UNUSED ELECTRONIC CABLES AT HOME**

### BEWARE OF FIRE HAZARDS

Cooking, heating, electrical outlets, cigarettes, and candles are common fire hazards. Don't keep fire hazards, such as curtains and paper towels near burners. Clean lint filters after use and ensure all vents are unobstructed.

### INSPECT

Test smoke alarms every month. Replace the batteries every year. With the help of professionals, you can regularly check if your smoke alarms, appliances, and outlets are in top condition.

**KEEP MATCHES & LIGHTERS OUT OF REACH OF CHILDREN**

**THE NUNAVUT FIRE MARSHAL'S OFFICE**
