RABIES ADVISORY:

Rabies is a naturally occurring disease that is endemic to wildlife, particularly canids, in Nunavut. Rabies can infect human beings, and if left untreated can cause death. All persons who may be exposed to rabies are strongly encouraged to obtain and keep updated with the pre-exposure vaccination.

All applications for Wildlife Observation Licences should be submitted to:

Coordinator, Operations and Regulations
Department of Environment
P.O. Box 1000, Stn 1320, Iqaluit, NU, X0A 0H0
