### MUNICIPAL BOUNDARY POLICY

---

#### **POLICY STATEMENT**

The Government of Nunavut (GN) may establish or revise municipal boundaries.

#### **PRINCIPLES**

This policy is based on the following principles:

- A municipal boundary should define a geographic area within which a community can realistically and regularly enforce its authority over all matters within its jurisdiction.
- A municipal boundary should reflect a sense of common association whereby people within that boundary relate to the locality as a centre for services.
- A boundary should be of such size and scope as to allow the community the capability to meet reasonable service demands for municipal services to be delivered in a cost effective manner to all community residents.
- The policy is guided by the following Inuit Quajimajatunqangit principles of:
  - Pijitsirniq: Serving and providing for family and/or community.

#### **APPLICATION**

This policy applies to the establishment or revision of municipal boundary within Nunavut.

#### **DEFINITIONS**

## PROVISIONS

### 1. Criteria

The following criteria shall be used in accordance with Article 14 of the NLCA in determining a newly established municipal boundary or in revision of an existing municipal boundary:

#### (a) General Criteria

##### (i) Territorial Boundary:

A municipal boundary must be within the boundary of Nunavut.

##### (ii) Continuous Area:

A municipal boundary shall be defined by one continuous, unbroken line. Exceptions shall be considered where it can be demonstrated that there are clear and tangible benefits to the community or that the community government's jurisdiction or authority over an area outside a continuous area is necessary.

##### (iii) Access:

Land within a municipal boundary should be relatively accessible both to the general public and to the community government in the usual conduct of its responsibilities.

#### (b) Specific Criteria:

Boundaries should include sufficient land to encompass:

(i) the projected expansion requirements of the community for a minimum of 20 years and a maximum of 30 years;

(ii) the community water supply;

(iii) the waste disposal areas;

(iv) if possible, resource areas sufficient to provide a 20-year supply of granular material for the community;

- (v) existing or proposed highways providing access to the community;
- (vi) community airstrips and docking areas;
- (vii) a necessary buffer area around the perimeter of the projected urban community to control development and discourage unorganized development;
- (viii) areas contiguous to the community that are actively utilized by the community on a continuous seasonal basis for recreational or other purposes and which have property development implications; and
- (ix) areas unique to a community on a case-by-case basis and which may be required by a community government in the conduct of its responsibilities.

## 2. Applications

- (a) Requests for the establishment of a new boundary or the revision of an existing boundary are to be submitted to the Minister of CGS.
- (b) In accordance with the *Cities, Towns and Villages Act*, or the *Hamlets Act*, as applicable, requests for the establishment of a new boundary should be in writing, accompanied by a request for incorporation. Requests for the revision of a boundary should be in writing, indicating the approval of the community government and accompanied by a map showing the proposed revision.
